(a) FramePack (13B, HunyuanVideo-based): tone
persistence α(t)
both routes
context only
image embedding only
both, anti-drifting sampler
SkyReels, 17 overlap frames
SkyReels, 5 overlap frames
(b) FramePack: scene content
content persistence κ(t)
both routes
context only
image embedding only
(c) MAGI-1 (4.5B, own architecture): tone
persistence α(t)
released window (4 chunks)
full history
seconds after the opening
(d) Matrix-Game-2.0 world model (exploratory 15 s)
persistence α(t)
both routes
context only
image embedding only
seconds after the opening
